

LEHI CITY CURBSIDE GREEN WASTE PROGRAM

PURPOSE

The Curbside Green Waste program is designed to help Lehi City residents recycle **green waste** at their property. Did you know that *every ton of green waste recycling could save three (3) cubic yards of landfill space!* Organic debris can be reused through purposes of mulching, composting, landscaping and helping the city sewage system. By participating in this program, residents can easily and conveniently recycle their green waste, which will contribute toward improving our environment.

PROGRAM

Lehi City will provide a separate 96-gallon container to City residents that wish to recycle **only organic waste**. Resident's simply roll the container to the curb and Waste Management does the rest. Organic green wastes such as broken down tree limbs, lawn & weed clippings, leaves and tree stumps will be accepted. Tree stumps may not be any bigger than 6" in diameter. **Paper, plastic and other household waste are not acceptable.**

NO PLASTIC BAGS!

SERVICE SCHEDULE

Containers will be serviced **once a week on Fridays**, and should be on the curb no later than 7:00am. The Program will run from April 1st through November 30th each year.

ELIGIBILITY

Any resident residing within the city limits of Lehi.

APPLICATION & IMPLEMENTATION

This is a voluntary subscription curbside program. A monthly service fee of \$5.50 will be charged and a seasonal commitment will be required. City residents are responsible for signing up through the City's utility department. Simply fill out the bottom portion of this flyer and return it to the **City Office** located at **153 North 100 East**.
